Implant Secured, Snap-In Lower Dentures

Snap-In dentures are the new standard for teeth replacement!

Many denture users struggle to keep their dentures secure, particularly in the lower jaw. If you have this problem, you already know of the embarrassment of slipping dentures, not being able to eat the foods that you love and the problems with denture adhesives.

Benefits

With increased comfort and less gum irritation, Snap-In Dentures, along with dental implants...

- are stable. You can even bite into an apple or enjoy that steak again!
- restore proper chewing, allowing for a better diet.
- can improve your speech and confidence.
- eliminate the problems and inconveniences of denture adhesives
- preserve your jaw bone and stops bone loss associated with denture wearing.

Am I a Candidate For Lower Snap-In Dentures?
Every patient is different and patient results may vary. Only a trained clinician, such as your Stellar Dental Care Professional, can choose the best treatment plan for you.

Before Treatment

Patient unhappy with denture instability

After Treatment

Modified denture snaps securely into place
